

This week...

We have been reading the story Titch and in our activities we have been learning to measure. We have measured things that are tall and short and recognised things that are big, medium and small.

In the block area we made towers that were taller and shorter than Titch and his brother and sister.

Story of the Week

Spring has sprung!

The children have been very busy looking after our gardens in Nursery. We have been looking for signs of spring and making sure our plants and flowers are watered. Our daffodil and flower patches have started to bloom and we have been drawing pictures to label the garden areas.

Investigation Station

Spring has arrived and we have been observing frogspawn in our class. We have also been busy in our garden making sure our pond is clean for our frogspawn. This week we noticed lots of little tadpoles swimming around the tank and they are growing well.

and grew.

Don't forget...

Next Wednesday is our school sing up assembly. Morning children will be performing in the show and afternoon children will perform in the Nursery for parents. The children are looking forward to taking part in the assembly and have been singing and dancing very well so far! We hope to see you there.

Homework challenge

Can you recognise taller and shorter objects? Colour them on your challenge paper!

Magical Moment
